Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Ishaan Pandey
Date of Feedback: 18th April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 15 minutes
Familiarity with AI-based applications: Intermediate

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [ ] 4 - Easy [X] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
The mood history feature was slightly hard to locate at first. Navigation to past sessions could be more intuitive.

4. What features or functionalities would you like to see added or improved?
A journaling feature and weekly mood summary would be helpful.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [ ] 4 - Likely [X] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Once the chatbot responded with a slightly generic coping tip that felt out of context, but overall it was fine.

8. How well did the application explain how the AI arrived at its outputs or decisions?

[ ] 1 - No Explanation [ ] 2 - Poor [X] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Yes, I could end the session or rephrase my input. No undo for AI responses though.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Only text inputs during conversation — no name, location, or health records required.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [X] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
A brief disclaimer was shown at the start stating data is not stored beyond the session. Clear enough.

13. Did the application request any permissions or data that you felt were unnecessary?
No unnecessary permissions were requested.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
No biased outputs observed.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
It should work reasonably well across backgrounds, but responses felt tuned to English-speaking, urban users.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [ ] 3 - Moderately [X] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
Not always clear. The chatbot blends AI and scripted responses without distinguishing them.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No explicit error-reporting mechanism. You can just rephrase and continue.

19. Do you think the application adequately disclosed its limitations?
It states at the start it is not a therapist, which is important.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
A pop-up consent message appeared before the first chat session.

21. Could you opt out of specific AI features while still using the application?
Yes — you can simply not engage with the mood tracking prompts.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
If a user in genuine crisis relies solely on this app instead of seeking real help, that is a serious risk.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No harmful outputs encountered.

25. Are there any groups of people who might be disproportionately harmed by this application?
Users with severe mental illness could be harmed if they over-rely on this app.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Could reduce referrals to student counselors if students feel the chatbot is sufficient.

27. Are there any concerns about the environmental impact of this application?
Minimal for a prototype, but LLM inference at scale has energy implications.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Add a clearer crisis escalation path with real counselor contact.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Good effort for a course project. The empathetic tone is well done.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Ishaan Pandey *Date: 18th April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Deekshant Singh Rajawat
Date of Feedback: 18th April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 20 minutes
Familiarity with AI-based applications: Intermediate

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [X] 4 - Easy [ ] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
Nothing was broken, but the response loading time was occasionally slow.

4. What features or functionalities would you like to see added or improved?
Voice input option and multi-language support would broaden accessibility.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
One response seemed overly optimistic for a message expressing hopelessness — a bit tone-deaf.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Limited control — I could not modify or delete a previous message in the conversation.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Only chat messages. No personal identifiers collected.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [X] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
Brief disclaimer at the top of the chat. No full privacy policy linked.

13. Did the application request any permissions or data that you felt were unnecessary?
No excessive data requests noted.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
No obvious bias, but responses felt slightly Western in framing of mental health concepts.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
May not resonate equally with users from different cultural contexts around mental health.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [X] 3 - Moderately [ ] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
It is not transparent about when it is following a script vs. generating a dynamic response.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No reporting mechanism exists currently.

19. Do you think the application adequately disclosed its limitations?
The disclaimer is there but could be more prominent throughout the conversation.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
A checkbox consent before starting the session.

21. Could you opt out of specific AI features while still using the application?
No explicit opt-out button, but you can ignore AI suggestions.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
The app could give false reassurance to someone who needs urgent clinical help.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No. Responses stayed within appropriate boundaries.

25. Are there any groups of people who might be disproportionately harmed by this application?
People with active mental health conditions and those with low digital literacy are more at risk.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Could partially substitute peer support roles, which has social downsides.

27. Are there any concerns about the environmental impact of this application?
Not addressed in the app. Worth adding a note about responsible AI consumption.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Improve the safety filter — add explicit escalation language for high-risk situations.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Solid prototype. The ethical awareness shown in the design is commendable.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Deekshant Singh Rajawat *Date: 18th April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Om Singh
Date of Feedback: 21st April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 10 minutes
Familiarity with AI-based applications: Intermediate

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [X] 4 - Easy [ ] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
The chatbot sometimes gave repetitive suggestions when I rephrased the same concern.

4. What features or functionalities would you like to see added or improved?
A resource library (articles, breathing exercises) would complement the chat well.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [X] 3 - Mixed [ ] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Responses were mostly relevant but occasionally generic.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Minimal control. Could not go back or edit previous inputs.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Only conversational text.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [X] 3 - Neutral [ ] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
Short note at start. No detailed policy available.

13. Did the application request any permissions or data that you felt were unnecessary?
No unnecessary permissions.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
No clear bias observed within my use.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
English-only currently limits accessibility for many students.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [X] 3 - Moderately [ ] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
Hard to distinguish AI-generated from rule-based responses.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No clear feedback or error reporting channel.

19. Do you think the application adequately disclosed its limitations?
Limitations mentioned briefly at start — could be reinforced mid-conversation.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
Simple pop-up before session started.

21. Could you opt out of specific AI features while still using the application?
Not explicitly, but features seem passive enough to ignore.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [X] 2 - Little [ ] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Someone in crisis might not be redirected quickly enough if the safety filter is not sensitive.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No harmful outputs encountered.

25. Are there any groups of people who might be disproportionately harmed by this application?
Students with severe anxiety or depression could develop unhealthy reliance.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Might reduce visits to the counseling center, which could be net negative for serious cases.

27. Are there any concerns about the environmental impact of this application?
Not considered in the current version. Worth noting in documentation.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [X] 3 - Neutral [ ] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Make crisis referral more prominent and immediate.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Good concept and execution for a student project. Needs more robustness for real-world use.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Om Singh *Date: 21st April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Abhinav Gupta
Date of Feedback: 21st April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 15 minutes
Familiarity with AI-based applications: Basic

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [ ] 4 - Easy [X] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [ ] 4 - Good [X] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
Nothing was confusing. Very easy to use.

4. What features or functionalities would you like to see added or improved?
Maybe a daily check-in reminder notification.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Responses felt natural and relevant to what I typed.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
I could restart the conversation but not undo a specific reply.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Nothing personal — just typed how I was feeling.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [X] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
There was a short message saying chats are not stored. That was enough for me.

13. Did the application request any permissions or data that you felt were unnecessary?
No permissions asked.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
Did not notice any bias.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
Seems friendly enough for most people, but language might be a barrier.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [ ] 3 - Moderately [X] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
I assumed it was all AI. No indication either way.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No way to flag a bad response that I could find.

19. Do you think the application adequately disclosed its limitations?
Yes, it said upfront it is not a real therapist.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
I clicked OK on a consent pop-up at the beginning.

21. Could you opt out of specific AI features while still using the application?
I think so, nothing felt forced.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Someone very vulnerable might take the chatbot's advice too seriously.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No.

25. Are there any groups of people who might be disproportionately harmed by this application?
Younger users or those in acute distress might be at higher risk.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Probably not in a major way at this stage.

27. Are there any concerns about the environmental impact of this application?
Did not think about it before. Worth considering.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Make it clearer when to seek a real counselor.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Really liked the calm tone. Felt non-judgmental.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Abhinav Gupta *Date: 21st April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Maulik Desai
Date of Feedback: 18th April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 20 minutes
Familiarity with AI-based applications: Advanced

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [X] 4 - Easy [ ] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
The AI sometimes hallucinated slightly — giving advice that did not match the emotional context.

4. What features or functionalities would you like to see added or improved?
Explainability layer — tell users why the AI is recommending a particular coping strategy.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [X] 3 - Neutral [ ] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [X] 3 - Mixed [ ] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Yes, once it gave a breathing exercise tip when the user expressed academic stress unrelated to anxiety.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Very limited. No way to adjust AI behavior or set preferences.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Text messages only. However, emotional content shared could be sensitive.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [X] 3 - Neutral [ ] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
Minimal disclosure. For a mental health app, a full DPDP-compliant policy is needed.

13. Did the application request any permissions or data that you felt were unnecessary?
No unnecessary permissions, but data handling policy is underspecified.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
Responses occasionally reflect a Western-centric view of coping (e.g., therapy framing).

15. Do you think the application would produce equitable results for users from diverse backgrounds?
Equity gaps likely for users from non-English backgrounds or low digital literacy.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [X] 3 - Moderately [ ] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
Not at all transparent about the decision-making process.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No mechanism. Major gap for a mental health application.

19. Do you think the application adequately disclosed its limitations?
Disclaimer is minimal. More prominent and repeated warnings needed.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
One-time pop-up. Not truly informed consent for a sensitive health context.

21. Could you opt out of specific AI features while still using the application?
Not explicitly offered.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [X] 2 - Little [ ] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Misinformation risk: an incorrect coping strategy recommendation could worsen someone's condition.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
One slightly dismissive response to a serious-sounding input. Needs better calibration.

25. Are there any groups of people who might be disproportionately harmed by this application?
Students with clinical-level depression or suicidal ideation are the most at-risk.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Could reduce demand for human counselors over time, which is a societal concern.

27. Are there any concerns about the environmental impact of this application?
LLM inference has a real carbon footprint. Not addressed anywhere.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [X] 3 - Neutral [ ] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Implement a proper escalation protocol with real-time counselor referral.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Technically sound for a prototype. Ethical depth needs significant improvement for production.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Maulik Desai *Date: 18th April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Amey Chhaya
Date of Feedback: 21st April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 10 minutes
Familiarity with AI-based applications: Intermediate

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [ ] 4 - Easy [X] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
Nothing broken. Interface was clean and easy.

4. What features or functionalities would you like to see added or improved?
Option to rate the chatbot's response in-app for feedback.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Mostly accurate. One response felt a bit templated.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [ ] 2 - Poor [X] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Could stop the chat anytime, but no fine-grained control.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Only text of my messages.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [X] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
Short consent note before the session. Simple and clear.

13. Did the application request any permissions or data that you felt were unnecessary?
No issues with permissions.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
No bias noticed.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
Probably yes for most students, though language and cultural context could vary.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [ ] 3 - Moderately [X] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
Not explicitly stated, but the responses felt AI-generated throughout.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No reporting feature visible.

19. Do you think the application adequately disclosed its limitations?
Yes — the 'not a therapist' note at the start is important and present.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
Pop-up before chat with a brief explanation.

21. Could you opt out of specific AI features while still using the application?
Seemed optional throughout.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Students might avoid seeking real help if they feel the chatbot is enough.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No offensive or harmful outputs.

25. Are there any groups of people who might be disproportionately harmed by this application?
Students already in a mental health crisis are most vulnerable.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Unlikely to replace counselors fully, but could reduce first-contact visits.

27. Are there any concerns about the environmental impact of this application?
Minor concern at prototype scale, but worth noting for future.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Add a visible 'Talk to a counselor' button throughout the chat.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Liked the name — 'sahara' feels warm and approachable.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Amey Chhaya *Date: 21st April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Avichal Sinha
Date of Feedback: 18th April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 15 minutes
Familiarity with AI-based applications: Intermediate

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [X] 4 - Easy [ ] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
Slightly slow response at times. No major functional issues.

4. What features or functionalities would you like to see added or improved?
Mood trend visualization over multiple sessions would be great.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Responses were mostly on point. One generic reply but not harmful.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [ ] 2 - Poor [X] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Could end the session or start a new one. No finer controls.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Only text chat messages.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [X] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
Brief disclaimer before session. Sufficient for a prototype.

13. Did the application request any permissions or data that you felt were unnecessary?
No unnecessary permissions.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
No biased outputs in my session.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
Should be fairly equitable for IIT student demographic. Broader use needs more testing.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [ ] 3 - Moderately [X] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
All responses appeared AI-driven. No distinction made.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No error reporting visible.

19. Do you think the application adequately disclosed its limitations?
Yes, clearly stated it is not a substitute for professional help.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
Consent pop-up at start of session.

21. Could you opt out of specific AI features while still using the application?
No active opt-out feature, but prompts were not intrusive.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Someone relying on it instead of calling a helpline in a real crisis is the biggest risk.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No.

25. Are there any groups of people who might be disproportionately harmed by this application?
Students going through acute mental health episodes need human support, not AI.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Possible reduction in counselor visits but unlikely to eliminate the need.

27. Are there any concerns about the environmental impact of this application?
Not addressed in the app, but relevant for any AI system.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Emergency escalation should be faster and more prominent.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Well-made for a course project. Ethical framework is clearly thought through.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Avichal Sinha *Date: 18th April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Ashish Aditya
Date of Feedback: 21st April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 10 minutes
Familiarity with AI-based applications: Basic

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [ ] 4 - Easy [X] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [ ] 4 - Good [X] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
Nothing confusing. Very simple to use.

4. What features or functionalities would you like to see added or improved?
Maybe some calming music or breathing exercises built in.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [ ] 4 - Likely [X] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
The chatbot seemed to understand my mood correctly.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
I could stop chatting whenever I wanted.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Just what I typed in the chat.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [ ] 4 - Comfortable [X] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
There was a message at the start. I read it and it seemed fine.

13. Did the application request any permissions or data that you felt were unnecessary?
Nothing unnecessary was asked.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
Did not notice anything like that.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
Worked well for me. Cannot speak for everyone.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [ ] 3 - Moderately [X] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
Did not think about it — assumed everything was AI.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
I did not see any option to report a bad response.

19. Do you think the application adequately disclosed its limitations?
Yes — it told me it was not a real doctor.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
I clicked agree before starting.

21. Could you opt out of specific AI features while still using the application?
Nothing felt forced on me.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Someone who is very sad might not realize they need real help if the app makes them feel okay.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No.

25. Are there any groups of people who might be disproportionately harmed by this application?
People going through very hard times might be affected more.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Probably not much, but could reduce some load on counselors.

27. Are there any concerns about the environmental impact of this application?
Did not think about it before, but it is a fair point.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Should always remind users to talk to a real person if things are serious.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Really liked it. Felt like the app genuinely cared.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Ashish Aditya *Date: 21st April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Tejas Gupta
Date of Feedback: 21st April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 20 minutes
Familiarity with AI-based applications: Intermediate

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [X] 4 - Easy [ ] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [X] 3 - Acceptable [ ] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
UI felt a bit plain. Some design polish would help trust and engagement.

4. What features or functionalities would you like to see added or improved?
Session history and the ability to revisit past conversations.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [X] 3 - Mixed [ ] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
A few responses did not fully address what I was expressing — felt like the AI moved on too fast.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Could not control depth or style of responses.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Only conversational messages. No other data.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [X] 3 - Neutral [ ] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
Brief note at start but no detailed policy. Could be stronger.

13. Did the application request any permissions or data that you felt were unnecessary?
No unnecessary requests.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
Nothing blatant, but responses could feel disconnected from Indian student experiences.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
May not feel culturally relevant to all users. Localization could help.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [X] 3 - Moderately [ ] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
No clear distinction made between scripted and AI-generated content.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No feedback mechanism in-app.

19. Do you think the application adequately disclosed its limitations?
Disclaimer is there but easy to miss. Should appear periodically.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
Pop-up consent at the beginning.

21. Could you opt out of specific AI features while still using the application?
Partially — no explicit controls but nothing felt mandatory.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [X] 2 - Little [ ] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
Incorrect emotional assessment by AI could make someone feel misunderstood or dismissed.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
Not harmful, but one response felt dismissive of a serious concern.

25. Are there any groups of people who might be disproportionately harmed by this application?
First-time mental health help-seekers and students from non-urban backgrounds.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Could partially reduce demand for peer support networks.

27. Are there any concerns about the environmental impact of this application?
Not considered. Would be good to add a note about this.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [X] 3 - Neutral [ ] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Improve the conversational depth — the AI should follow up more carefully.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Conceptually strong. Execution needs more refinement before real-world deployment.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Tejas Gupta *Date: 21st April 2026*

Customer Feedback Questionnaire

AI-Based Application — Ethical Issues with AI Course

Section A: Respondent Information

Respondent Name: Ankit
Date of Feedback: 18th April 2026
Application Name: Sahara
Team / Student Names: Ishaan Pandey, Om Singh, Deekshant Singh Rajawat
How did you access the application?: Web link
Duration of usage before giving feedback: 10 minutes
Familiarity with AI-based applications: Basic

Section B: General Usability & Functionality

1. How easy was it to understand the purpose of the application on first use?
[ ] 1 - Very Difficult [ ] 2 - Difficult [ ] 3 - Neutral [X] 4 - Easy [ ] 5 - Very Easy

2. How would you rate the overall user interface and navigation?
[ ] 1 - Very Poor [ ] 2 - Poor [ ] 3 - Acceptable [X] 4 - Good [ ] 5 - Excellent

3. Were there any features that were confusing or did not work as expected?
No broken features. Interface was simple enough.

4. What features or functionalities would you like to see added or improved?
Add Hindi language support for wider reach.

5. How likely are you to use this application regularly if it were fully developed?
[ ] 1 - Very Unlikely [ ] 2 - Unlikely [ ] 3 - Neutral [X] 4 - Likely [ ] 5 - Very Likely

Section C: AI-Specific Feedback

6. How accurate or relevant were the AI-generated outputs/recommendations you received?
[ ] 1 - Very Inaccurate [ ] 2 - Inaccurate [ ] 3 - Mixed [X] 4 - Accurate [ ] 5 - Very Accurate

7. Did the AI produce any outputs that were incorrect, misleading, or unexpected?
Responses seemed relevant to what I typed.

8. How well did the application explain how the AI arrived at its outputs or decisions?
[ ] 1 - No Explanation [X] 2 - Poor [ ] 3 - Partial [ ] 4 - Good [ ] 5 - Fully Transparent

9. Did you feel you had adequate control over the AI's actions within the application?
Could restart or stop. That was enough for basic use.

Section D: Ethical Issues

D1: Privacy & Data Handling

10. What personal data, if any, did the application ask you to provide?
Just the messages I sent.

11. How comfortable were you with the amount of personal data the application collected?
[ ] 1 - Very Uncomfortable [ ] 2 - Uncomfortable [ ] 3 - Neutral [X] 4 - Comfortable [ ] 5 - Very Comfortable

12. Was there a clear privacy policy or data usage disclosure? What did it state?
There was a short note before I started. Seemed okay.

13. Did the application request any permissions or data that you felt were unnecessary?
Nothing extra was asked.

D2: Bias & Fairness

14. Did you observe any outputs that appeared biased based on any characteristic?
Did not notice any.

15. Do you think the application would produce equitable results for users from diverse backgrounds?
English-only is a limitation. Hindi support would help a lot of students.

16. How confident are you that the application treats all users fairly?
[ ] 1 - Not at All [ ] 2 - Slightly [X] 3 - Moderately [ ] 4 - Very [ ] 5 - Completely

D3: Transparency & Accountability

17. Was it clear to you when the AI was making decisions versus a human-defined rule?
I assumed it was AI throughout.

18. If the AI made an error, was there a clear mechanism to report it or seek correction?
No option to report anything.

19. Do you think the application adequately disclosed its limitations?
Yes, told me it is not a replacement for a doctor.

D4: Consent & User Autonomy

20. Did the application obtain your informed consent before collecting data or performing AI-driven actions?
I agreed to a pop-up before the chat began.

21. Could you opt out of specific AI features while still using the application?
Nothing felt compulsory.

22. How much control did you feel you had over your own data within the application?
[ ] 1 - No Control [ ] 2 - Little [X] 3 - Some [ ] 4 - Good Control [ ] 5 - Full Control

D5: Safety & Potential Harms

23. Can you identify any scenario where this application could cause harm to a user or a third party?
If the chatbot misses that someone is in crisis, that could be dangerous.

24. Did you encounter any outputs that could be considered harmful, offensive, or inappropriate?
No.

25. Are there any groups of people who might be disproportionately harmed by this application?
Students who do not speak English well might get worse support.

D6: Broader Societal & Environmental Impact

26. Does this application have the potential to displace human jobs or reduce human decision-making?
Might reduce some visits to the counselor, but real help is still needed.

27. Are there any concerns about the environmental impact of this application?
Not something I thought about before.

Section E: Overall Assessment

28. Overall, how ethically responsible do you consider this application to be?
[ ] 1 - Very Irresponsible [ ] 2 - Irresponsible [ ] 3 - Neutral [X] 4 - Responsible [ ] 5 - Very Responsible

29. What is the single most important ethical improvement the developers should prioritize?
Add Hindi or regional language support.

30. Please share any additional feedback, concerns, or suggestions not covered above.
Simple and calming. Good work by the team.

Declaration: I confirm that the feedback provided above is my honest assessment based on my experience with the application.

Respondent Signature: Ankit *Date: 18th April 2026*
